

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (original) A method for controlling plant growth, said method comprising selecting an area in which weed growth control is desired; and applying aggregates of cellulose-containing particles containing a plant growth toxin to the area.
2. (original) A method as in claim 1 wherein the area is a horticultural area which contains growing plants.
3. (original) A method as in claim 2 further comprising mulching the plants with the aggregates.
4. (original) A method as in claim 3 wherein a major portion, on a weight basis, of the aggregates have a volume in the range of from about 0.5 cc to about 150 cc, and the aggregates consist primarily of ground up paper.
5. (original) A method as in claim 4 wherein the plant growth toxin is selected from the group consisting of Oryzalin, Isoxaben, Trifluralin, Prodamine, Oxyflurofen + Pendimethalin, Oxadiazon, Pendimethalin, Benefrin + Oryzalin, Oxyfurofen + Oxidazon and Metolachlor.
6. (original) A method for repelling insects, said method comprising selecting an area from which it is desired to repel insects; and placing aggregates of cellulose-containing particles containing an insect repellant in the area.
7. (original) A method as in claim 6 wherein the insect repellant is a naturally occurring product.
8. (original) A method as in claim 6 wherein the insect repellant is selected from the group

consisting of citrus oil, cedar oil, liquid garlic, cloves, citronella oil, white pepper, catnip oil, soybean oil, rosemary oil, pennyroyal oil, borax, boric acid and DEET.

9. (original) A method as in claim 8 wherein the aggregates consist primarily of ground up paper and a major portion, on a weight basis, of the aggregates have a volume in the range of from about 0.5 cc to about 150 cc and are in the form of pellets.

10. (original) A method as in claim 9 comprising broadcasting the pellets in a yard around a home.

11. (original) A method as in claim 9 comprising mulching plants with the pellets.

12. (original) A method as in claim 9 wherein the area is selected from a cat litter box and a chicken coop.

13. (original) A method as in claim 9 comprising placing the pellets in animal bedding.

14. (original) A method as in claim 9 wherein the pellets contain from about 0.1 to about 10 percent by weight of cedar oil.

15. (original) A method as in claim 9 wherein the pellets contain in the range of from about 0.5 to about 5 percent by weight of cedar oil and are broadcast at a rate in the range of from about 10 to about 200 pounds of pellets per acre.

16. (currently amended) A method for seeding an area, said method comprising broadcasting articles of manufacture according to claim 25 in the form of pellets or briquettes over the area.

17. (original) A method as in claim 16 wherein the pellets or briquettes have an average volume

in the range of from about 0.5 to about 150 cc each.

18. (currently amended) A method as in claim 17 wherein the core pellets or briquettes further contain contains a source of assimilable nitrogen.

19. (previously presented) A method as in claim 18 wherein the source is selected from the group consisting of commercial fertilizer and chicken litter.

20. (currently amended) A method as in claim 19 wherein the pellets or briquettes contain in the range of from about 1-10% each of adhesive and seeds, and the seeds are adhered to the core pellets or briquettes by the adhesive.

21. (original) A method as in claim 20 wherein the pellets or briquettes are broadcast at a rate sufficient to result in the application of 1 to 200 pounds of seed per acre.

22. (original) A pellet consisting primarily of ground-up paper which has been impregnated with a plant growth toxin selected from the group consisting of Oryzalin, Isoxaben, Trifluralin, Prodamine, Oxyflurofen + Pendimethalin, Oxadiazon, Pendimethalin, Benefrin + Oryzalin, Oxyfurofen + Oxidazon and Metolachlor in an amount in the range of from about 0.1 to about 10 weight percent.

23. (original) A pellet consisting primarily of ground-up paper which has been impregnated with an insect repellant selected from the group consisting of citrus oil, cedar oil, liquid garlic, cloves, citronella oil, white pepper, catnip oil, soybean oil, rosemary oil, pennyroyal oil, borax, boric acid and DEET in an amount in the range of from about 0.1 to about 15 weight percent.

24. (original) A pellet as in claim 23 which has a volume in the range of from about 0.5 to about 150 cc and contains in the range of from about 0.5 to about 15 weight percent of cedar oil.

25. (currently amended) An article of manufacture comprising  
a consolidated core of primarily consisting essentially of ground up cellulose, and  
an adhesive coating over the core carrying seeds.
26. (currently amended) An article of manufacture as in claim 25 wherein the core is in the form  
of a pellet or briquette and at least 50 percent by weight of the ground up cellulose is in the form  
of comminuted paper particles aggregated together.
27. (currently amended) An article of manufacture as in claim 26 25 wherein the core is in the  
form of a pellet or briquette and the adhesive is selected the group consisting of starch and clay  
deposited on an outer surface of the pellet or briquette and the pellet or briquette has a circular,  
square, or flattened cross section,
28. (currently amended) An article of manufacture as in claim 27 wherein the seeds are grass  
seeds in an amount in the range of from 1 to 10 weight percent.
29. (original) An article of manufacture as in claim 28 which has a volume in the range of from  
about 0.5 to about 150 cc.
